COURTTECH PADEL

designed by

Favaretti PADEL

German Engineering combined with Italian Design

Based on decades of experience in the sports court business, we at CourtTech know what it takes for a sport to be played on the perfect playing surface. Whether its at a local club or a professional tournament, nothing is more important than the court itself.

We have a passion for sport, and it translates into our products and service. In co-operation with the University of Applied Science of Rosenheim, Germany, we developed a worldbeating engineered squash court wall system which has helped take us to one of the leading squash court manufacturers in the world.

Now with the same passion, enthusiasm and energy, we will apply our same business ethics and vision into the sport of Padel. It is with this vision that we have partnered with Favaretti Group of Italy. A company with sleek italian design and quality that has taken them to the top of their field in sports facilities.

With an incredible and powerful combination of German Engineering with Italian Design, CourtTech Padel Courts will not only look the best but will play the best.

Our Courts

Our panoramic courts are made in our factories using galvanised steel with 12mm tempered glass for optimal safety, playability and viewing.

Our Standards

- Tracks designed in compliance with local/national construction norms about wind and earthquake loads
- Factory Production Control in Compliance with EN 1090
- CE certificate to guarantees high quality standard
- Hot-dip galvanising and painting
- Safety glass

The CourtTech Club Court

- Hot-dipped galvanized steel structure
- Panoramic tempered 12 mm glass for optimal viewing and performance
- Fibrillated Turf 200 m² with white lines (sand and glue included), available in blue, red, green
- CT Padel Performance Net
- CT Padel Protective padding for net post and court entrance

The CourtTech Pro Court

- Hot-dipped galvanized steel structure
- Panoramic tempered 12 mm glass for optimal viewing and performance
- Texturized Turf in black with orange lines or Mondo Supercourt XN Turf, available in red, blue or green with white lines
- CT Padel Performance Net
- CT Padel Protective padding for net post and court entrance
- Light posts with 8 x 130 W – 300 lux bulbs (electric connection not included)

The CourtTech Custom Tour Court

- Hot-dipped galvanized steel structure
- Panoramic tempered 12 mm glass for optimal viewing and performance
- Texturized turf with a range of colour combinations available
- Custom logo net
- Custom protective padding for net and court entrance
- Custom coloured light posts with 8 x 130 W – 300 lux bulbs (electric connection not included)
- Custom club logo embedded into the court turf
- Light posts with 8 x 130 W – 300 lux bulbs (electric connection not included), available in a range of colours

Our Turfs

Customising your padel court starts with the turf. We only supply the best solutions available on the market in various colors.

High-quality courts completely designed and manufactured in our own factories with a wide range of customization possibilities.

FIBRILLATED

Turf featuring an exclusive fibrillation alignment pattern: the cutting sequence is thicker and longer, allowing progressive fibrillation and the fibres that make up the turf retain their excellent friction, resilience and abrasion resistance longer. The result? A remarkable aesthetic performance and a longer duration over time!

MONOFILAMENT

Thanks to the central spine of the fibre and its straight structure, this turf is characterized by improved resilience: the fibers recover their original position after the passage of the player or the impact of the ball. What are the advantages? The rebound is quicker, smoother and more regular and helps to reduce the wear and tear on the ball itself because it does not damage the felt.

TEXTURED

State-of-the-art artificial turf system consisting of semi-concave straight monofilaments with central spine and silica sand infill. The best of the best of padel turfs, this type of model was also used for the central court of the World Padel Tour!

Available colours

Covers from Favaretti Group

Complete your padel club with a certified and guaranteed cover that allows you to play 365 days a year!

Our PADEL ARENAS are 100 % custom-designed by our technical department and manufactured in-house to guarantee the highest possible quality and technical standards.

Each structure is supplied with a calculation report in compliance with NTC2018, material certifications and guarantees for resistance to snow, wind and seismic loads as stated by local regulations.

There are plenty of customization options and accessories available to make your padel arena as comfortable and high-performance as possible.

SIDE WALLS THAT CAN BE OPENED.

The sliding walls allow immediate and fast opening even with a single operator. They can be made of PVC fabric (color of your choice) with wind bracing, an agile sliding system and pedestrian entrances, or with more elegant and high-performance rigid frames made of polycarbonate, glass or opaque panels.

Contact

At CourtTech, we will help you through every stage of the project from permits to building work, which court is best for you and transport.

We will always remain at your disposal for any questions or information you require.
